Senior Software Engineer (Scala)

Dear Recruiter!

I am a Senior Software Engineer who continuously updates his knowledge using Code Retreat, Code Kata, typelevel.org, packtpub.com, manning.com, rockthejvm.com, hackerrank.com and adventofcode.com and earns the trust of big brands while developing solutions for them.

They are: Morgan Stanley, hotels.com, expedia.com, Vodafone, Nokia, Panasonic, Volkswagen, Samsung and Ricoh.

I enjoy working with **Scala** on Microservices, DSLs for Hardware Designers and on computation-heavy backend applications using Functional Programming for
• Arteris IP, 6 months
• Invia CEE, 7 months
• Morgan Stanley, 2 and half years

I am proud of my Java VM experience collected on Android, Spring, J2EE server and desktop system projects for
• CAS Software AG, 3 years
• EPAM Systems Inc, 1 year
• Tigra Kft., 2 years
• CCC Software Oy, 6 years

Please see my recommendations

Bartosz Malec
Director of Engineering at Invia CEE
June 18, 2024, Bartosz managed me directly

I had the pleasure of working with Janos for several months on a complex project at Invia. Janos consistently demonstrated an open-minded and proactive approach to problem-solving, always striving to find the best solutions. His support and collaboration with colleagues were invaluable, showcasing his dedication to the team's success. As an experienced Scala developer, Janos brought both technical expertise and a positive attitude to our team.

Francesco Filasieno
Electronic Engineer, Data science and Web3 enthusiast at Arteris IP
February 7, 2024, Francesco worked with me on the same team

I had the pleasure of working with Janos in Arteris for about one year, he played a key role in the development of some fundamental components in our software infrastructure. He is a valuable engineer that brings a lot to the table, from experience to good practices, and he's always up for a good chat. I will be pleased if we work together again.
